Teacher Tips - for Parents & Caregivers:

Create a Positive Learning Environment:

Try to find a time and quiet space that works best for you and your little one to focus together, even if for just 15-20 minutes. Keep your phone away if possible to help avoid distractions.

Promote a Growth Mindset: *All things are difficult before they are easy.* Thomas Fuller

Helping your child adopt a growth mindset will increase their confidence and improve their resilience.

How can you help?

1. Be Positive and Encouraging:

Young children need a whole lot of encouragement to help develop confidence. Provide positive reinforcement when they have learned something new and avoid unnecessary criticism.

When your child becomes frustrated, remain calm and encourage them to take 3 big breaths before resuming the activity. Let them know that becoming frustrated is a natural part of learning and that you will help them work through it.

Ex: Respond to:

2. Model the Growth Mindset Yourself:

Be enthusiastic. Show them how exciting and fun learning can be.

Focus on the learning experience that is taking place, not the result or performance:

Ex:

I haven't finished the maze YET
but I will continue to try new routes

I wonder what
will happen if
I go there?

3. Ask them Questions about their Learning to Help them Reflect and Spark Curiosity.

Ex:

How did you
do that?

Why did you choose that?

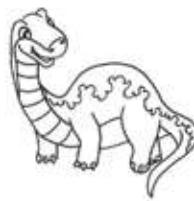

What if you
decided to do
this?

Allow these tips to help you develop a closer bond with your little one, while helping develop resilience and the confidence to learn new things.

Have fun!

THE ADVENTURE BEGINS:

Beau the Brontosaurus

Tag the T Rex

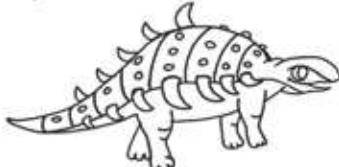

Tori the Triceratops

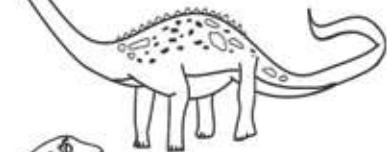

Parker the Pteradactol

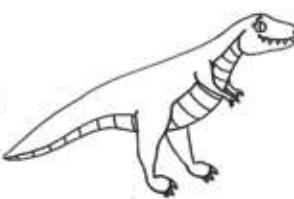

Hunter the Hylaeosaurus

Mackenzie the Maxakalisaurus

and Ava the Albertosaurus

are all going on adventures through the Jurassic wilderness. Help them find their ways to different destinations without getting lost. At each destination they will find a clue word. To find the words they will have to make their way around erupting volcanoes, across dangerous rivers, and through storms. They will also have to out-smart packs of hungry raptors trying to find them along the way. If you lead them wisely, they will survive, if not, they will become lost or fall prey to the ravenous raptors, so lead them well!

Directions:

- Complete the mazes in order. There are 4 levels with 7 kids' mazes per level as well as a total of 7 adult (Raptor) mazes. There is also a dot-to-dot to complete and color at the end of each level.
- Once a maze is complete, find the clue word at the end of the book with the solution.
- No peeking at words or solutions before hand!
- Do the dot-to-dots and color them in as you like.
- Once all mazes in a level are complete, put the clue words together to make the sentence. Parents and caregivers can help with writing out the sentence.
- Parents and caregivers, please join in for the adult mazes and assist with the clue words for some intellectual bonding time.

Have fun!
